

mavconn::MAVConnInterface

std::enable\_shared\_from\_this< MAVConnTCPClient >

mavconn::MAVConnTCPClient

```
classDiagram
    class MAVConnInterface {
    }
    class MAVConnTCPClient {
    }
    MAVConnInterface <|-- MAVConnTCPClient
```

The diagram illustrates a class hierarchy. At the top, there are two boxes: 'mavconn::MAVConnInterface' on the left and 'std::enable\_shared\_from\_this< MAVConnTCPClient >' on the right. A horizontal line connects the bottom of these two boxes. From the center of this line, a vertical line descends to the top of a third box, 'mavconn::MAVConnTCPClient'. This vertical line is part of a larger structure that also includes a horizontal line segment extending to the right, ending in an arrowhead pointing towards the 'std::enable\_shared\_from\_this' box. This indicates that 'mavconn::MAVConnTCPClient' inherits from 'mavconn::MAVConnInterface' and also inherits from 'std::enable\_shared\_from\_this< MAVConnTCPClient >'.
